

WHAT IS MONKEYPOX?

Monkeypox is a viral infection transmitted through close personal contact, such as kissing, sex, and other skin-to-skin contact. Many cases have been mild, but severe illness may occur. No matter what, stay updated & informed.

Learn more about Monkey Pox on the CDC's website

SYMPTOMS:

Rashes, bumps, or blisters.

These may appear anywhere on the body, including genitals. Symptoms may look similar to syphilis, herpes, or other common skin rashes.

WHAT TO DO:

Contact a provider & ask for testing if you have symptoms. Avoid close contact and wear a mask around others until you get checked out.

If you do not have a primary care provider and you have any of the symptoms above, please make an appointment at The Denver Sexual Health Clinic
